WORK EXPERIENCE – PRODUCT MANAGEMENT & DECISION SCIENCES

Goldman Sachs (**$100 Billion** Investment Bank) — Jun 2022 – Present
Product Manager – Embedded Lending — Dallas, TX

- Drove the end-to-end product development process from ideation to launch for an Embedded BNPL Software as a Service product
  - Conducted **UX research**, **market analysis** & **competitive analysis** to identify user needs, validate hypotheses and inform product decisions
  - Worked with **50+ Engineers** over **20+ sprints** by writing and prioritizing product requirements, crafting user-stories, writing acceptance criteria, performing sprint grooming & planning, and coordinating UATs and weekly releases
  - **Analyzed data** and performed **monthly competitive analysis** to **inform product decisions** and present to **senior leadership**
- Piloted an embedded lending partnership with a **Fortune 50** retailer
  - Worked with **Solution Architects, UX designers** and **Sales** to **customize mockups** for RFPs designed for **4+** prospects, leading to a signed partnership with a **Fortune 50** retail giant
  - Helped in defining the partnership playbook along with KPIs for internal and external parties
- Led the development of a payment monitoring system, resulting in ~ 50% decrease in average time spent per payment and reducing monitoring cost by ~70%
  - Conducted **15** user interviews to understand user needs and to identify key problems in their current user journey
  - Built an **MVP** in collaboration with the UX Design team, and gathered feedback from end-users in multiple iterations
  - Worked with **15+** Engineers and **3** UX Designers over **11+** sprints by writing product specs, crafting user-stories, performing sprint grooming & planning, and coordinating UATs and weekly releases

Formlabs (**$2 Billion** 3-D Printing Manufacturing Firm) — Aug 2021 – Dec 2021
Software Product Management Intern — Sommerville, MA

- Led the development and launch of the online shopping experience for two 3D printers: Form 3L and Form 3BL
  - Performed **qualitative UX research** techniques – **Focus groups and interviews** to identify opportunities to improve the shopping experience
  - Worked with **6** Engineers, **2** UX Designers, **2** Content Writers over **8** sprints by writing product requirements, crafting user-stories, writing acceptance criteria, performing sprint grooming & planning, coordinating UATs, releases, and leading sprint reviews and retrospectives
- Built a dashboard to evaluate the effectiveness of A/B tests run on the Formlabs website
  - Defined the key KPIs that determine the effectiveness of A/B tests & developed the dashboard using SQL, BigQuery and Redash

Civitas Learning (**$350 Million** Predictive Artificial Intelligence (A.I) Ed-Tech Firm) — June 2019 – Aug 2019
Software Product Management Intern — Austin, TX

- Saved $140K through a business-case analysis to inform an investment decision in their flagship product with an ARR of $5MM
  - Performed **20+** customer interviews, competitive analysis, market analysis, risk identification, and financial and resource impact analysis, to provide a **recommendation** to the **Director of Product** while collaborating with **5+** teams and ensuring the recommendation aligns with the company's short-term and long-term strategies

PalindromeVR (Virtual Reality Game Development Startup) — May 2016 – Jul 2018
Game Developer — Mumbai, IN

- Developed 2 Virtual Reality Games for the Google Cardboard and Daydream, downloaded in 12 countries with a 4.1 rating on Google Play
  - Developed both games from end to end, including asset designing in Blender, and game design & game development using Unity 3D
  - Implemented streaming assets to reduce game size by 33% without a decrease in performance

Mu Sigma (**$1.5 Billion** Management Consulting firm, Top 15 Indian Unicorn) — Aug 2015 – Apr 2016
Associate Decision Scientist — Bengaluru, IN

- Devised a BAU framework for a **Fortune 200** Retail Giant to analyze 200+ monthly online ad campaigns, resulting in profits of ~**$1.3MM** and higher supplier satisfaction
  - Analyzed **200+** monthly online ad campaigns for SKUs using **test and control statistical analysis** in Excel, defined and tracked SKU performance metrics, and provided monthly actionable insights to Category Managers on SKUs performance, resulting in **profits of ~$1.3MM** and **improved supplier satisfaction**
